

# Process & Decision Documentation

Adjusted blob edge deformation to be more aggressive and changed the colour scheme to be orange to better represent the emotion of “anxiety”. Increased speed and reduced friction to make it harder to control. Made platforms smaller and added two more to add to the difficulty and add more variety.

Latest deployments from pinned environments

The screenshot shows the GitHub Deployments page for the 'github-pages' environment. It displays 8 deployments, all of which occurred 2 weeks ago. The deployments are listed in descending order of time, starting with the most recent at the top. Each deployment entry includes a checkbox, the deployment status (e.g., 'Add files via upload' or 'Added README content'), the target branch ('main'), the time of deployment ('2 weeks ago'), and a three-dot menu icon. The deployments are: 1. Add files via upload (Active), 2. Added README content, 3. Added platforms, updated visuals, made blob harder to control, 4. Changed speed animation, increased friction, 5. Decreased friction, increased animation speed, 6. Changed physics, blob appearance, 7. Added example code, and 8. Added example code.
